School Daze Notes

The Saturday school was well attended with about a dozen students taking the opportunity to thrash around the Pentress track. The course had increasing, decreasing, and constant radius corners as well as a slalom and a very long straight, so students got a feel for the different elements of an autocross course. Times dropped steadily as everyone began to pick up the course and the feel of their cars. Many club members assisted as instructors, timers and registrars and were rewarded with the opportunity to run their cars. A few people to help work the course (pick up flattened cones etc.) would have helped even more. Students were allowed as many runs as their tire budget permitted. As a note the Christmas tree and timer worked flawlessly throughout the very sunny afternoon.

To the dismay of the students the course was substantially revised for the Sunday Autocross.
